

Switch Module Buttons

Features

- Replacement buttons for the teleCARE switch modules
- Allows switch modules to be adapted to suit regional requirements
- Large and small sized plastic buttons
- Available in various colors
- Symbols printed in white
- Text printed in white or black

Description

Replacement plastic switch module buttons for teleCARE switch modules and for use in the teleCARE IP customisable modules.

Allows the colours of teleCARE switch modules buttons to be adapted to fulfil regional requirements.

Available in various colors with printed white coloured symbols and printed text in white or black.

Normally the buttons are changed in conjunction with button function changes.

Changing the function of the switch button is achieved with the teleCARE IP System Manager, the teleCARE M TIP program or switch module hardware programming.

Important: The procedures for changing switch module are described in the Button Replacement Instructions manual (TD93071EN). The procedures must be followed carefully to avoid damaging the switch module printed circuit board and to prevent mechanical damage and malfunctioning of the switch module after buttons are replaced.

Note: Appropriate ESD safe working procedures must be applied when changing switch module buttons.

Technical Specifications and Button Details
